

Would you like to quit smoking?

A new study being conducted at the Cardiology Research Department at Hartford Hospital may be able to help.

To participate you must:

- Be between 30-50 years old
- Smoke at least one pack of cigarettes a day for more than 10 years
- Be willing to participate in a 10 week smoking cessation program
- Be healthy
- Not be pregnant

*A small number of non-smokers will also be needed

Participation requires:

- Laboratory visits including a non-invasive artery function test, blood samples, physical exam and medical history
- Participation in Hartford Hospital's 10 wk. smoking cessation program at no cost (smokers)

Participants will receive:

- Financial compensation of \$100 for smokers and non-smokers who complete the first 3 visits
- Financial compensation of an additional \$150 for smokers who successfully complete the smoking cessation program and quit smoking.
